

JFE Group CSR REPORT 2014

Environmental Data Book

This book contains supplemental information and data relating to environmental measures for three JFE Group companies, as well as information and data relating to the JFE Group's recycling business.

Please read this book in conjunction with the "JFE Group CSR Report 2014" to gain a more comprehensive understanding of JFE's environmental initiatives.

CONTENTS

- **01** Scope of Report
- 02 Organizational Profile

JFE Group

- 03 Status of ISO 14001 Certification
- 04 JFE Group's Environmental Accounting / CO2 Emissions of the JFE Group
- **05** JFE Group Recycling Businesses
- **06** JFE Group's Recycling Business List
- 07 Priority Environmental Targets and Results

JFE Steel

- 09 Material Flow
- **11** Input Materials / Output Products
- **12** Recycled Resources / CO₂ Emissions and Energy Consumption
- **13** CO₂ Emissions and Energy Consumption
- 14 Disposed Substances

JFE Engineering

- 20 Input Materials / Output Products
- 21 CO₂ Emissions
- 22 Disposed Substances / Management of Chemical Substances
- 23 Waste Disposal in Each Section and Works

JFE Shoji Trade

- 25 Electricity Consumption and CO₂ Emissions / Input Materials
- 26 Comparison with Environmental Reporting Guidelines 2012 (Ministry of the Environment, Japan)

Scope of Report

Reporting Period

FY2013 (April 1, 2013 to March 31, 2014) Data for the recycling business covers activities undertaken during the period up to August 31, 2014.

Organizations Covered

1. JFE Holdings, Inc. and its operating companies:

- JFE Steel Corporation
- JFE Engineering Corporation
- JFE Shoji Trade Corporation

2. The following items include data from "Major Domestic Group Companies Included in the Scope of Reporting" listed below.

- [Environment]
- Status of ISO 14001 certification
- CO₂ emissions
- Energy consumption (JFE Steel Group, JFE Engineering Group)
- Electricity consumption (JFE Shoji Trade Group)
- [Society]
- Compliance training
- Rate of lost-work time injuries and severity rate (JFE Shoji Trade Group)

Major Domestic and Overseas Group Companies Included in the Scope of Reporting JFE Steel Group

JFE Steel Corporation and 38 consolidated subsidiaries (Total: 39 companies)

JFE Mineral Company, Ltd., Mizushima Ferroalloy Co., Ltd., JFE Material Co., Ltd., Chiba Riverment and Cement Corp., Mizushima Riverment Corp., JFE Precision Co., Ltd., JFE Plastic Resource Corporation, JFE Bars & Shapes Corp., JFE Metal Products & Engineering Inc., JFE Galvanizing & Coating Co., Ltd., JFE Container Co., Ltd., JFE Welded Pipe Manufacturing Co., Ltd., JFE Steel Pipe Co., Ltd., Galvatex Corp., Kawasaki Kokan Co., Ltd.*, JFE Pipe Fitting Mfg. CO2 Emission Factor for Purchased Electricity

• JFE Steel uses the emission factor of the Japan Iron and Steel Federation's Voluntary Action Plan. Note that values for FY2012 were used for FY2013.

JFE Engineering uses the unadjusted emission factors of each electric power company for each fiscal year.
 JFE Steel Group companies, excluding JFE Steel, and JFE Shoji Trade Group companies use the CO₂ equivalent of 0.000550 (t-CO₂/kWh) for the FY2012 unadjusted emission factors of each electric power company.

|------------------------------|-----------------|--|--|--|--|--|
| | IFF Steel | • Continue to improve environmental management systems, including in Group companies | | | | |
| Management | | • Voluntary activities for environmental preservation | | | | |
| | JFE Engineering | Enhancement of Group-wide compliance | | | | |
| | JFE Shoji Trade | • Enhancement of Group-wide compliance | | | | |
| | JFE Steel | Following completion of Japan Iron and Steel Federation's Voluntary Action Program, continue global-warming measures to help meet Low-Carbon Society Action Plan targets (set by Japan Iron and Steel Federation), including cutting CO₂ emissions by five million tonnes in 2020 compared to business as usual | | | | |
| Global Warming Prevention | JFE Engineering | Achieve results equivalent to or exceeding voluntary action plan targets of Japan Society of Industrial Machinery Manufacturers | | | | |
| | JFE Shoji Trade | Reduce electricity consumption Reduce copy paper usage | | | | |
| Pollution Prevention | JFE Steel | Cut dioxin emissions to less than 5.5 g-TEQ per year on average in FY2012 – FY2016 under new national reduction plan | | | | |
| | | • Reduce dust and sludge and promote recycling | | | | |
| Resource Recycling | | • Conduct waste-related education in response to revised data sheet on waste | | | | |
| | JFE Engineering | At construction sites: • Recycle at least 99.5% of rubble • Recycle at least 95.0% of sludge • Recycle at least 85.0% of industrial wastes (excluding rubble and sludge) | | | | |
| Products and Services | JFE Engineering | Establish targets and implement environmentally friendly initiatives in R&D, planning and design sections of each division | | | | |

| compliance | | |
|---|------------|--|
| Conducted environmental management training for new managers (three times for 62 participants) Conducted environmental auditing at 33 workplaces | \bigcirc | • Voluntary activities for environmental preservation |
| Conducted environmental inspections at all construction sites Conducted group-wide environmental compliance audit | \bigcirc | • Enhancement of Group-wide compliance |
| Self-confirmed legal compliance Conducted environmental audit of group companies | 0 | • Continue to self-confirm legal compliance |
| Implemented Eco-Processes, Eco-Solutions, Eco- Products ("Three Ecos") initiative and COURSE 50 program for developing innovative steelmaking processes | \bigcirc | • Maintain Eco-Processes, Eco-Solutions, Eco-Products ("Three Ecos") initiative and COURSE 50 program for developing innovative steelmaking processes |
| Achieved average decrease of 14.9% between FY2008 and FY2012 compared to FY1997 FY2013 emissions: 13,300 tonnes | \bigcirc | Achieve results equivalent to or exceeding voluntary action plan targets of Japan Society of Industrial Machinery Manufacturers |
| Reduced electricity consumption by 48% compared to FY2001 Reduced copy paper usage by 0.8% compared to FY2001 | \bigcirc | Maintain measures for reducing electricity consumption Maintain measures for reducing copy paper usage |
| Achieved emissions below 6.6 g-TEQ per year (five- year average) | _ | • Cut dioxin emissions to less than 5.5 g-TEQ per year on average between FY2012 and FY2016 under new national reduction plan |
| Kurashiki: Reduced waste by 800 tonnes by turning oil-containing sludge into a valuable resource Chiba: Installed sludge recycling equipment | \bigcirc | • Reduce dust and sludge and promote recycling efforts |
| Conducted training using data sheet on waste (2nd edition) | 0 | _ |
| Recycled 99.9% of rubble Recycled 99.2% of sludge Recycled 96.2% of industrial wastes (excluding rubble and sludge) | 0 | Pursue targets for construction sites and add targets modified for each division: Recycle at least 99.5% of rubble Recycle at least 95.0% of sludge Recycle at least 85.0% of industrial wastes (excluding rubble and sludge) |
| Achieved 59 targets established company-wide | \bigcirc | Establish targets and implement environmentally friendly initiatives in R&D, planning and design sections of each division |

CO₂ Emission Factor for Purchased Energy JFE Steel uses the emission factor of the Japan Iron and Steel Federation's Voluntary Action Plan. Note that values for FY2012 were used for FY2013.

 With the exception of JFE Steel, companies use the CO₂ equivalent of 0.000550 (t-CO₂/ kWh) for the FY2012 unadjusted emission factors of each electric power company.

Status of JFE Steel

Energy-derived CO₂ Emissions and Unit CO₂ Emissions

* Values for past fiscal years were recalculated retroactively in line with a change in the definition of electricity emission factors (based on the reception

of electric power instead of transmission) in 2013. Calculations were based on the premise that the CO2 emission factor for FY2013 was the same as that for FY2012.
