(4) Notes to Condensed Quarterly Consolidated Financial Statements

Notes on Segment information

(1) Overview of reportable segments

The Group organized under JFE Holdings executed commercial activities through three operating companies—JFE Steel Corporation, JFE Engineering Corporation and JFE Shoji Corporation—in accordance with the characteristics of their respective businesses. Consolidated reporting segments, one for each operating company, were characterized by their constituent products and services. No business segment was consolidated for reporting purposes.

Each segment had its own respective products and services. The steel business produced and sold various steel products, processed steel products and raw materials, and provided transportation and other related businesses such as facility maintenance and construction. The engineering business handled engineering for energy, urban environment, steel structures and industrial machines, recycling and electricity retailing. The trading business purchased, processed and distributed steel products, raw materials for steel production, nonferrous metal products, and food, etc.

(2) Information on reportable segments

The Group assesses segment performance on the basis of segment profit. Segment profit is profit before tax excluding one-time items of a materially significant value.
